Characteristics

IMPRI-FIX is a cationic bituminous emulsion, made from pure asphalt bitumen emulsified in water using surfactants, and hydrochloric acid. Due to its cationic nature, it can be used with aggregates of different nature, basic or acidic.

Uses

Due to the adherence provided, the main application of **IMPRI-FIX** is the use as a bond between the concrete or asphalt substrate and the layer to be applied on top of cold or hot asphalt.

Benefits

IMPRI-FIX is a cationic bituminous emulsion, and it can be used with aggregates of different nature, basic or acidic. Moreover, the application is easy and quick.

Packaging and Storage

IMPRI-FIX is supplied in 25 kg containers.

Must be stored at temperatures between 5°C and 40°C in its original container, preserving it from the intense cold and away from heat sources. Containers must be kept tightly closed to prevent the formation of a surface film due to evaporation of water. It has a lifespan of 6 months from the date of manufacture.

Application

1. Remove the product to homogenize it before applying.
2. Apply with a roller or brush on the surface to be treated, applying 1 kg/m².
