| Product name: | RUBBER TILES FOR SHOOTING GALLERY |
| Uses: | Shooting galleries. |
| Supplier: | FIXER PAVIMENTOS TECNICOS, S.L. P.I. "La Muntanya" Parcelas 44 y 45 46293 - Beneixida (Valencia) Tel: +34 96 297 66 30 administracion@fixer.es |
| Emergency telephone: | +34 91 562 04 20 National Institute of Toxicology |

Description

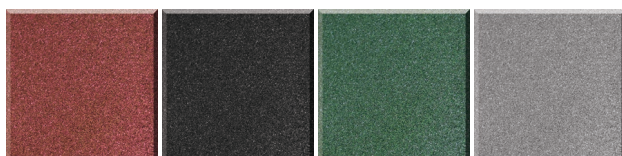

The tiles and pieces of recycled rubber are organic products, in which approximately 90% of its components are already used rubber (tires out of use), which is crushed and selected for further use.

They have no substances harmful to health. The tile binder is exempt from CIFC, PCB, lindane and formaldehyde.

Applications

The walls of the shooting galleries must be covered with corrugated rubber sheets fixed on wood to break the sound wave and absorb the projectile, which can be deflected toward the ceiling, and avoid rebounds. The tiles made for this purpose have the necessary characteristics to meet these requirements.

They are available in different colours: red, black, green and grey.

Advantages

- Easy to clean and waterproof, thus avoids the deposit of gunpowder residues and the risk of fire.
- Cushioning and shock absorption.
- Soundproofing.
- Resistant to adverse weather conditions (suitable for shooting ranges).
- Ecological material. These protective plates are made of truck tires out of use, so we guarantee that they do not contain traces of other materials that may be harmful or dangerous.

TECHNICAL DATA SHEET

RUBBER TILES FOR SHOOTING GALLERY

Technical properties

| | |
|---------------------|---|
| Materials | Recycled rubber granulate reinforced with polyurethane. |
| Colours | Red, black, green and grey. |
| Density (g/cc) | 1.06 g/cm ³ |
| Hardness Shore A | 80° Shore |
| Abrasion resistance | 130 |
| Fire resistance | M 3 |
| Measures | 1000x500x50 mm |
